# UXOMAP
UXO SURVEY

UXOMAP *specializes in* **UXO survey on land and underwater**.
UXOMAP *is an* **innovative and independent** *company and is composed of experts in physics and geophysics but also qualified and experienced in the implementation of geophysical data acquisition techniques and tools.*

We have 15 years of experience in the domain of locating and isolating suspect UXO's for our customers in order to **advise** them and **direct** them to the **best technical and financial solutions** for safe execution of planned works

Conscious of the **necessary quality and efficiency** of UXO survey, we make every effort to assist our clients in managing the risk throughout their project.

The results obtained will all be georeferenced with pluricentimetric precision and rendered in compatible format with most of office software (Office suite), DAO (.dwg, .dxf ...) or SIG (.shp; .gpkg ...).

Our organization and our commercial network allow us an ensured **reactivity** on the delivery of the quotations, the triggering of the interventions and the respect of the deadline.

At the end of the survey, if the risk is confirmed, the zones must be subjected to a **UXO clearance**. In this case, **UXOMAP** will put you in contact as soon as possible with the most suitable partner to treat this pollution.

As part of its development and continuous improvement, **UXOMAP** is one of the founding members of **UXOGROUP**, a **European group of companies specialising in the field of UXO** survey and clearance, operating in 6 European countries (France, Belgium, Italy, The Netherlands, Germany and UK). Thanks to the partnerships developed with land and underwater UXO clearance companies, **UXOMAP** implements its **expertise** in permanent.
